

Fabricated Locally in Saint Petersburg, FL

2.5X Strength & Seal

Industrial Grade 6063-T5 aluminum that is 2.5X the thickness and density of most competing products; allowing it to withstand a jaw dropping 40,000+ PSI. Thicker, larger, and denser 2-phase age-resistant EPDM gaskets for maximum seal and longevity.

Dam It Difference

Providing a turnkey solution with all systems quoted, engineered, fabricated, and installed in-house by our licensed team of employees. We also offer storage solutions for when systems are not actively deployed.

Dam It Defense

Flood Prevention Systems

Peace of mind every hurricane season

About Us

Dedicated to defending communities, we provide solutions that mitigate the risks of climate change, hurricanes and floods.

Founded by a team with over a decade of experience in aluminum manufacturing, the quality and craftsmanship of our products is trusted by marquee homes and commercial properties, Fortune 500 companies, HOA communities, cities and municipalities.

Built to withstand up to 10ft of water, our systems use rustproof reinforced aluminum, solid cast stainless steel components, and rubberized gaskets that increase in strength when holding back water. Our semi-permanent design minimizes aesthetic impact and makes setup and takedown fast and easy.

When flooding hits home, we provide defense.

As Seen On

Designed for Homes, Communities, Commercial, and Industrial Applications

Engineered for rapid, reliable deployment season after season. Unlike sandbags, plywood, and temporary barriers that often leak, fail, or wash away; our systems provide structural integrity you can trust.

Google Reviews

"The quote for cost of this system was competitive with inferior products I had quoted previously. The measurement was quick and efficient. The masonry contractor(s) were professional, neat and organized. They came up with a creative solution to a complex situation. The installation team was also professional, and respectful of our home. We really felt as if Dam It Defense was approaching our "job" like they were protecting their own homes." - Brian Arthur
